

Your New Age Digital Transformation Partner

MindInventory is a prominent Design and Development Company in India where dreams get shapes and ultimate success using Design and Development talency.

We have pool of seasoned Internet marketing minds to augment branding for our clienteles on the web and boost the growth of mobile applications marketing on various mobile marketplaces.

Intro

"Minds in the Machine: Crafting Intelligence with Analytics, AI & ML"

The AI/ML development services has progressed swiftly, transitioning from the modernization of data architecture for AI to the expansion of intelligent business processes at scale.

Enterprises that take this route of Digital Transformation would need to put core forecasting and insights to anticipate, plan, and optimize costs to ensure their business is more productive.

AI Solutions to Achieve **Business Intelligence**

Our Partnership empowers customers to leverage data, coupled with artificial intelligence, driving the acceleration of business transformation.

Data

- ✓ AI-Powered Data Integration
- ✓ Automated Data Cleansing
- ✓ Data Visualisation
- ✓ Data Warehousing
- ✓ Data Processing and ETL
- ✓ Data Analytics

Artificial Intelligence

- ✓ Custom AI Application Development
- ✓ Natural Language Processing (NLP)
- ✓ Computer Vision
- ✓ Speech Recognition and Synthesis
- ✓ Conversational AI

Machine Learning

- ✓ Custom Machine Learning Development
- ✓ ML Model Development and Training
- ✓ Predictive Modeling
- ✓ Reinforcement Learning
- ✓ Anomaly Detection
- ✓ Robotic Process Automation

Analytics

- ✓ Cognitive Search
- ✓ Predictive Analytics
- ✓ Prescriptive Analytics
- ✓ Chatbots for BI Interactions
- ✓ Automated Data Discovery

Generative AI

- ✓ Industry Domain Based Chatbot
- ✓ Image, Audio & Video Generation
- ✓ Retrieval Augmented Generation
- ✓ AI Agent Building
- ✓ Generative AI for Gaming

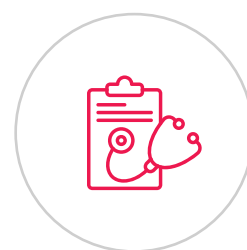

Fintech

- ✔ Fraud Detection Systems
- ✔ Chatbots and Virtual Assistants
- ✔ Robo-Advisors
- ✔ Predictive Analytics for Market Trends
- ✔ Sentiment Analysis in Trading

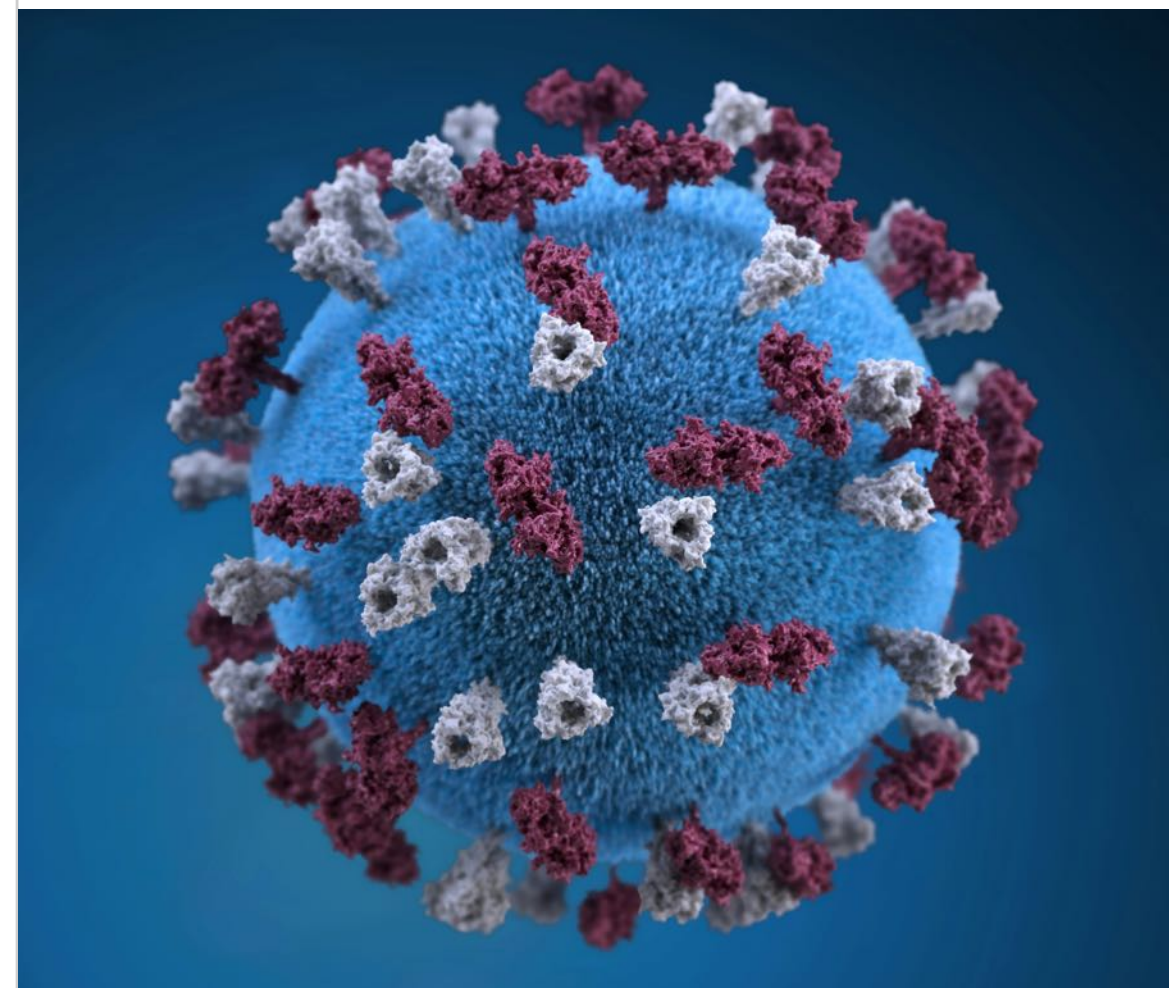

Retail/Ecommerce

- ✔ Personalized Product Recommendations
- ✔ Visual Search and Image Recognition
- ✔ Chatbots and Virtual Assistants
- ✔ Fraud Detection and Prevention
- ✔ Customer Churn Prediction

Healthcare

- ✔ Virtual Health Assistants
- ✔ Patient Engagement and Behavioral Health
- ✔ Voice Recognition Transcription
- ✔ CV Diagnostic Imaging Solution
- ✔ Remote Patient Monitoring

Real Estate

- ✔ Predictive Analytics for Property Values
- ✔ Automated Document Management
- ✔ AI Based Safety Management
- ✔ Virtual Tours and Augmented Reality
- ✔ Virtual Tours and AR

AI-Analytics Consulting Services

Our AI-Analytics Consulting services guide clients through every stage of their AI journey. In the early phases, our experts formulate a potent AI and Data strategy aligned with business goals.

As clients progress, we actively participate in model development, leveraging big data engineering solutions to scale operations and implement automation. Post-automation, our Data Operations services ensure uninterrupted data management, enabling sustained growth with a focus on core business concerns.

Customer Asks

- ✔ Craft a Strategic Data Approach
- ✔ Develop Advanced AI Models
- ✔ Scale Analytics Operations
- ✔ Optimize & Fine-Tune Analytics Models
- ✔ Big Data Engineering

We Provide

- ✔ Tailored Data Strategies for Business Growth
- ✔ Transformative AI Model Development
- ✔ Comprehensive Big Data Scaling Solutions
- ✔ Enhanced Model Efficiency and Optimization
- ✔ Scalable Big Data Solutions

Artificial Intelligence Services

At every step of the AI journey, our development services guide clients from formulating a robust AI strategy in the early stages to actively participating in model development as data becomes available.

Further, we extend our support to scale operations and implement automation using comprehensive AI engineering solutions. Post-automation, our dedicated services ensure the continual evolution of AI models, allowing clients to focus on their core business and experience sustained growth in the dynamic AI landscape.

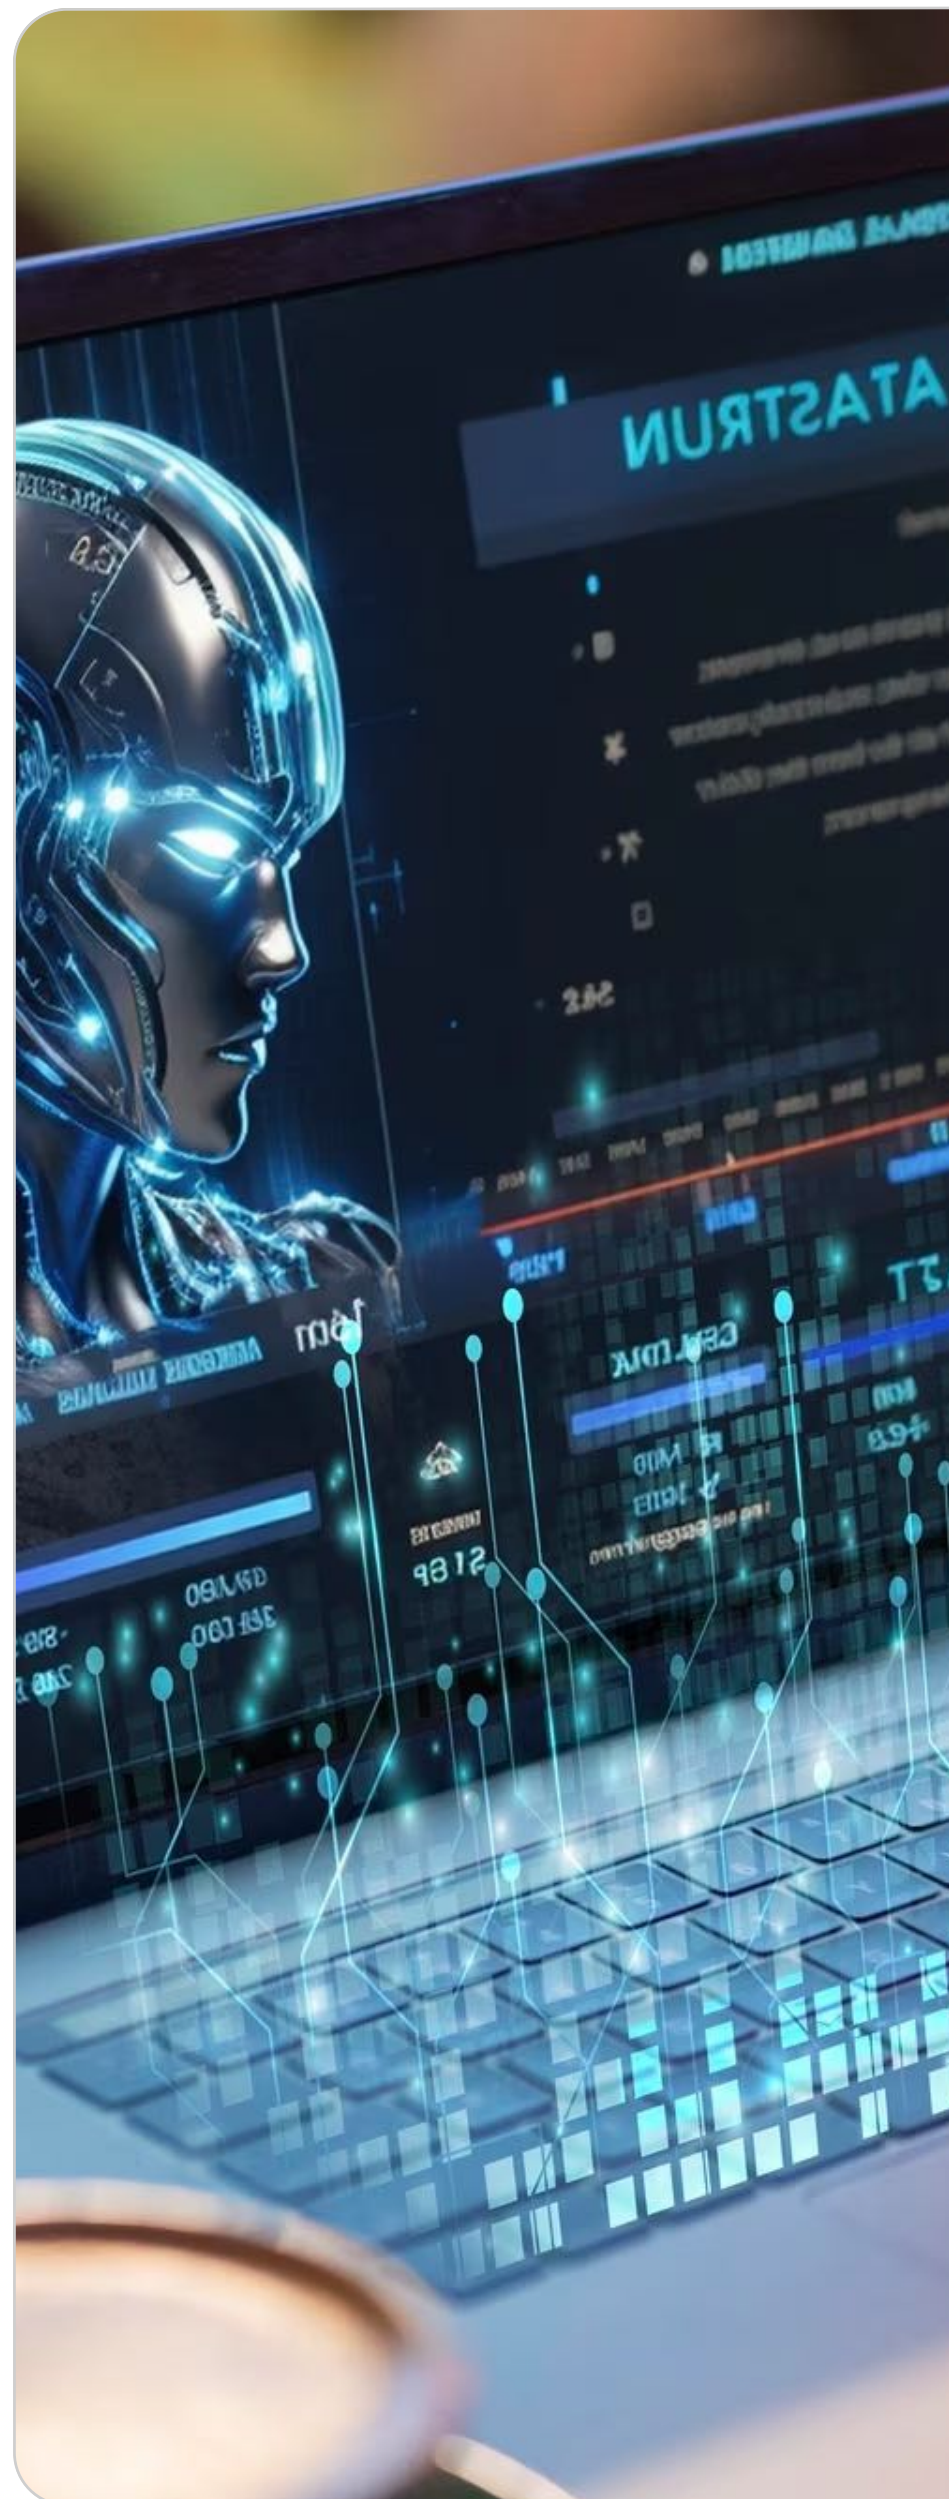

Customer Asks

- ✔ AI Strategy and Roadmap
- ✔ AI Model Development
- ✔ Natural Language Processing
- ✔ Computer Vision Applications
- ✔ AI-Driven Automation
- ✔ AI in Predictive Analytics

We Provide

- ✔ Tailored AI Strategy Consulting
- ✔ End-to-End Model Development Services
- ✔ NLP Solutions for Unstructured Data
- ✔ Customized Computer Vision Solutions
- ✔ Comprehensive Automation Services
- ✔ Predictive Analytics with AI Integration

Machine Learning Services

At every step of the AI journey, our development services guide clients from formulating a robust AI strategy in the early stages to actively participating in model development as data becomes available.

Further, we extend our support to scale operations and implement automation using comprehensive AI engineering solutions. Post-automation, our dedicated services ensure the continual evolution of AI models, allowing clients to focus on their core business and experience sustained growth in the dynamic AI landscape.

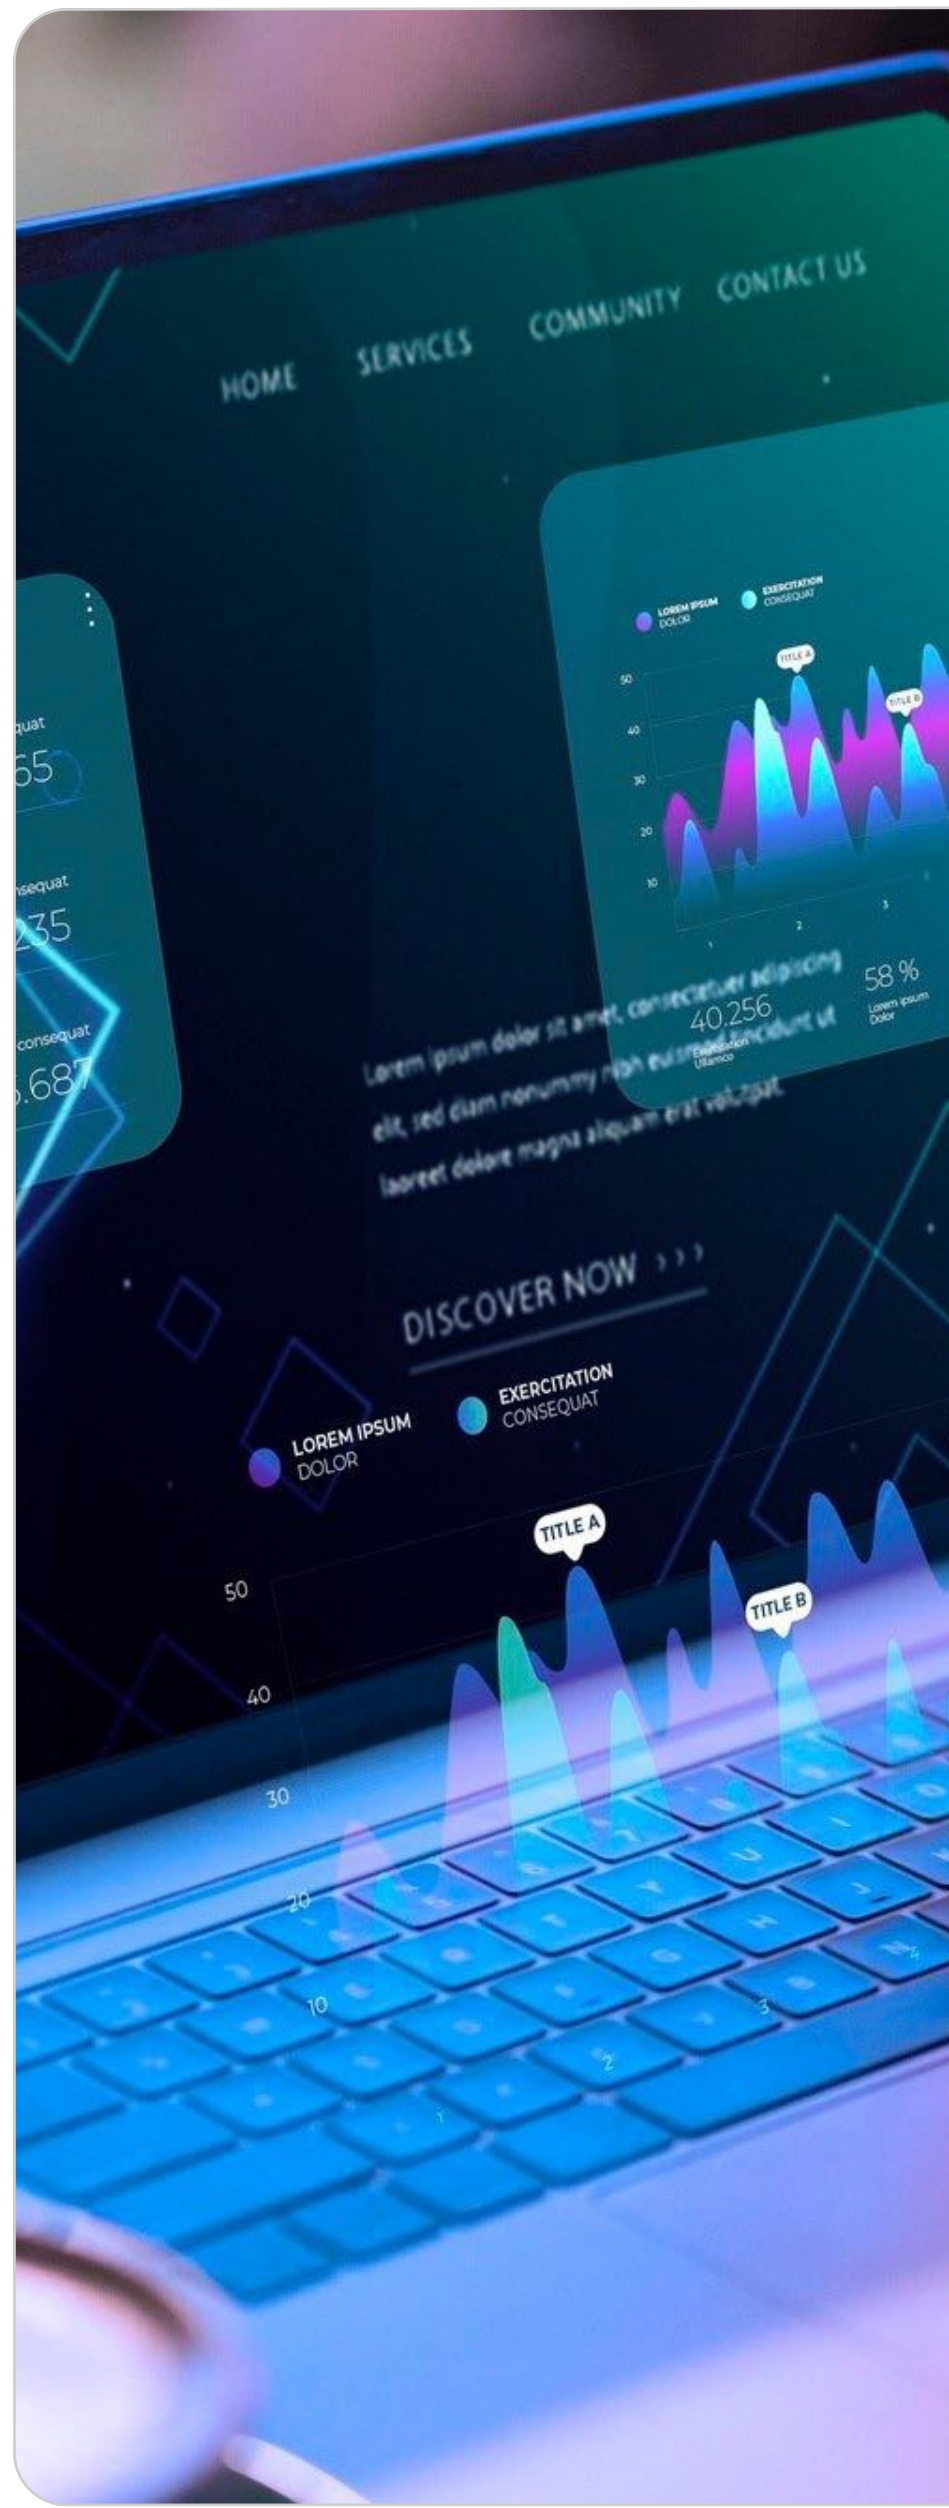

Customer Asks

- ✔ Custom ML Models
- ✔ Anomaly Detection
- ✔ Personalization Algorithms
- ✔ Continuous Learning Models
- ✔ Classification and Categorization
- ✔ Image and Pattern Recognition

We Provide

- ✔ Tailored Model Development
- ✔ Anomaly Recognition Solutions
- ✔ AI-Driven Personalization
- ✔ Adaptive ML Solutions
- ✔ Robust Classification Models
- ✔ Computer Vision Solutions

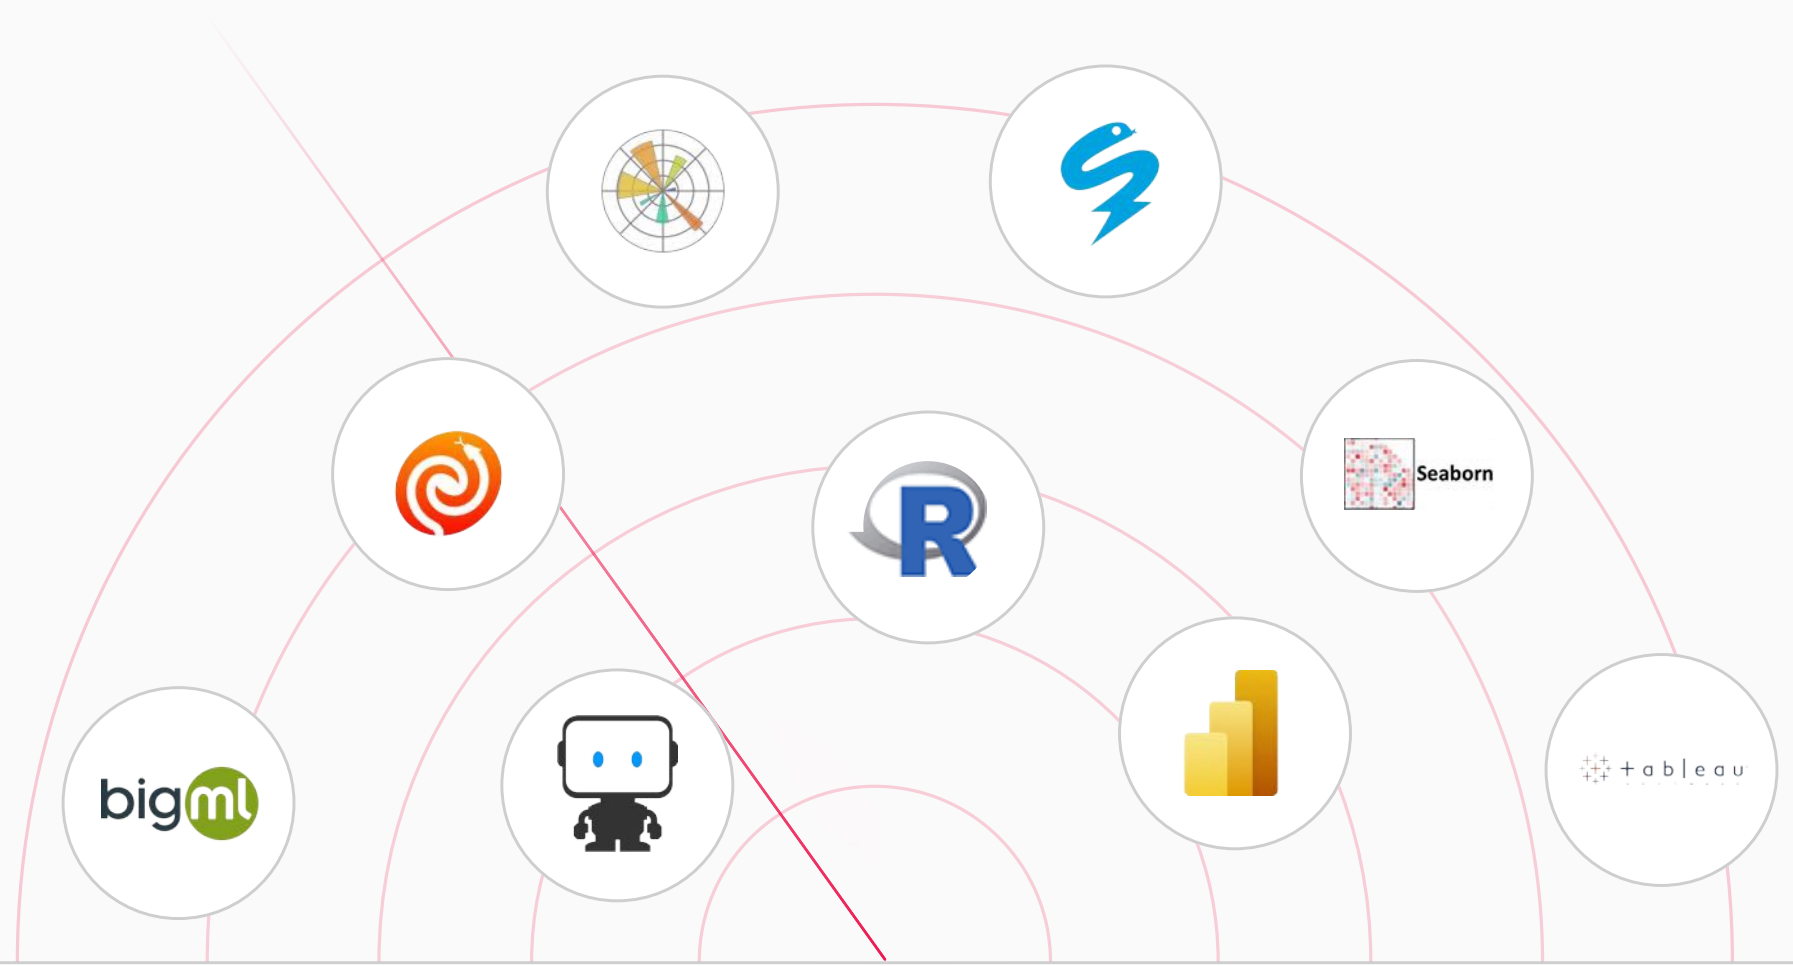

Data Related Services

At every step of the AI journey, our development services guide clients from formulating a robust AI strategy in the early stages to actively participating in model development as data becomes available.

Further, we extend our support to scale operations and implement automation using comprehensive AI engineering solutions. Post-automation, our dedicated services ensure the continual evolution of AI models, allowing clients to focus on their core business and experience sustained growth in the dynamic AI landscape.

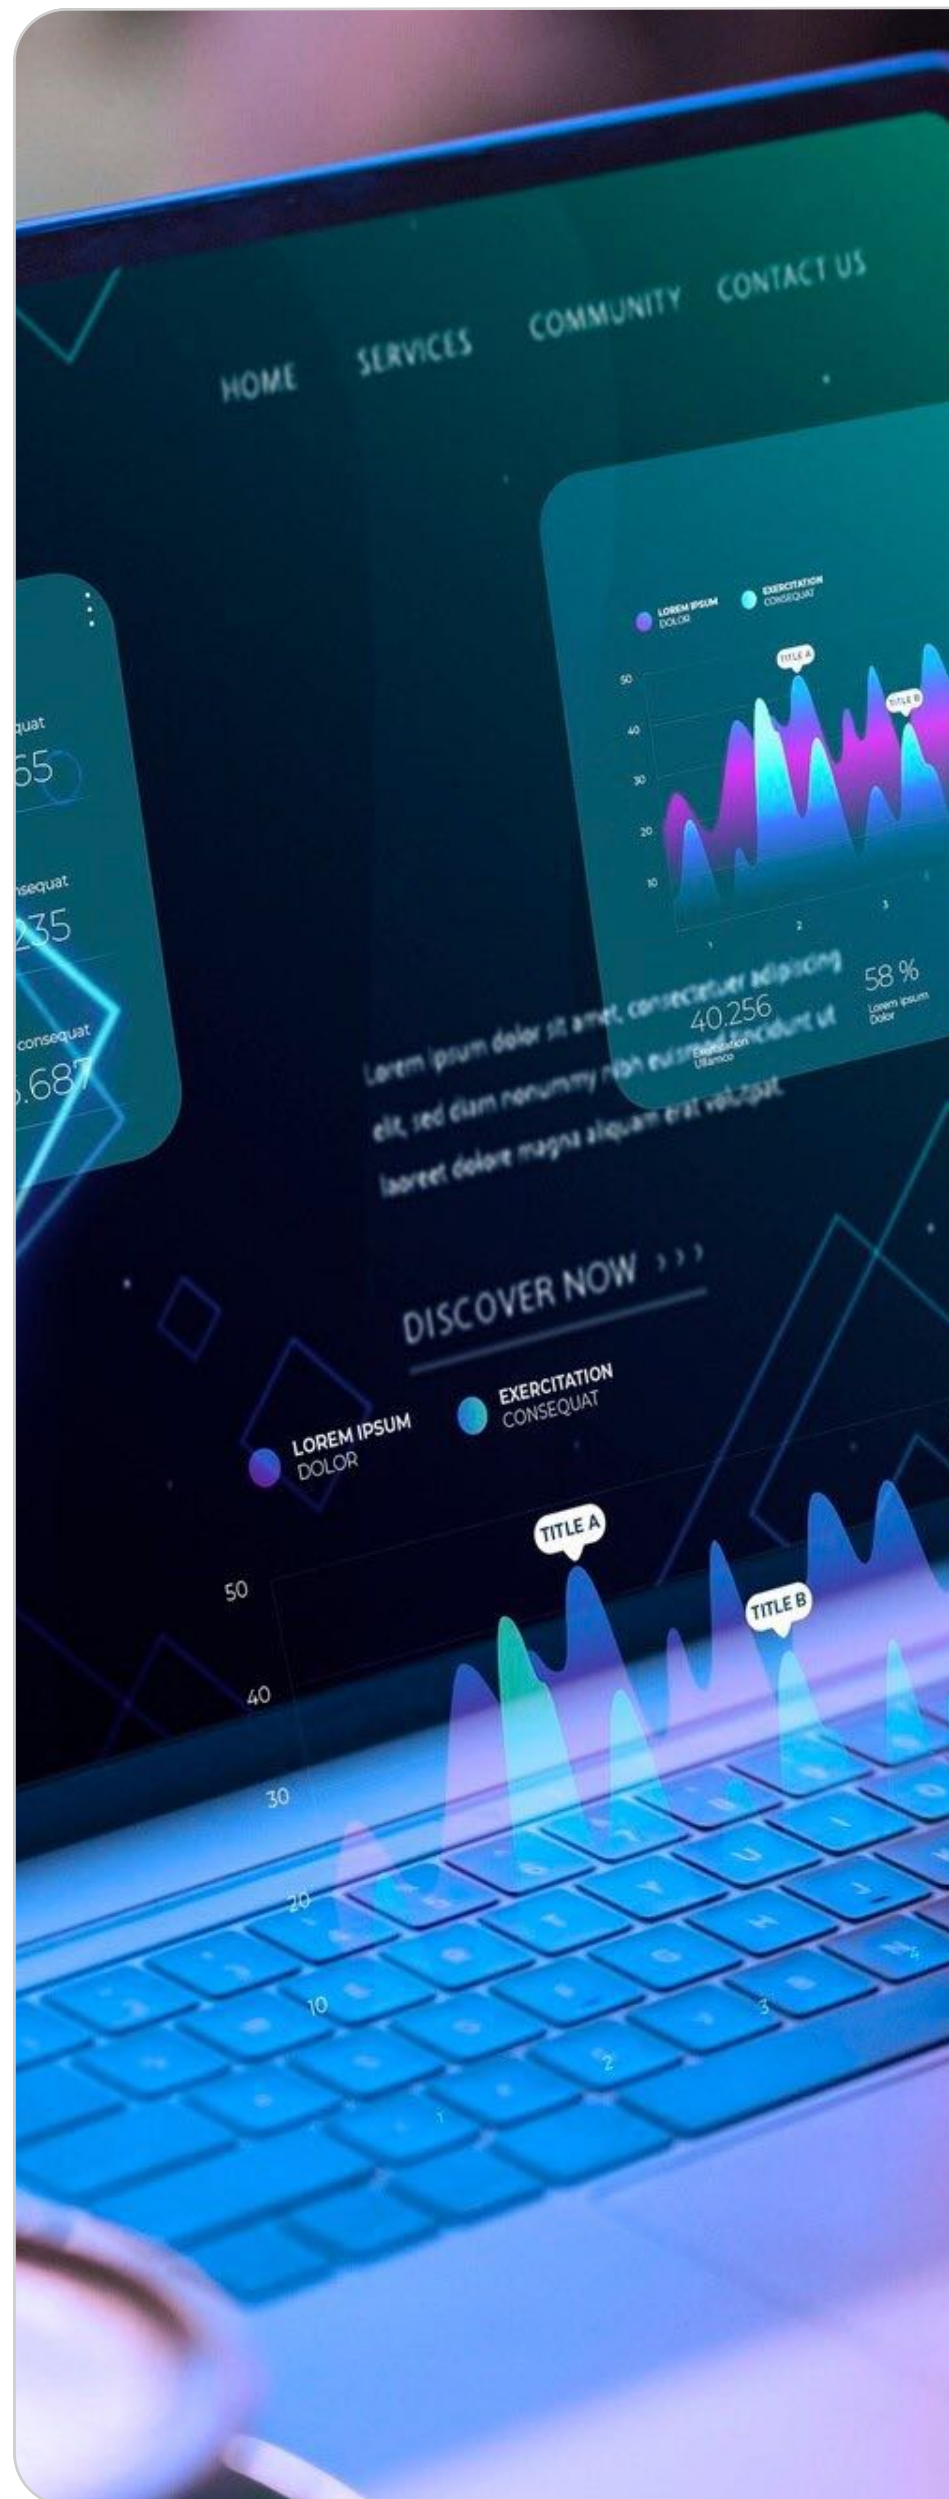

Customer Asks

- ✔ Efficient Data Integration (ETL)
- ✔ Data Visualisation
- ✔ Data Governance and Compliance
- ✔ Weather Data Retrieval
- ✔ Price Tracking and Comparison
- ✔ Data Harvesting from Websites

We Provide

- ✔ Seamless ETL Solutions
- ✔ Compelling Visual Analytics
- ✔ Robust Data Governance Frameworks
- ✔ Weather Forecast Scraping
- ✔ E-commerce Price Scraping
- ✔ Targeted Web Scraping

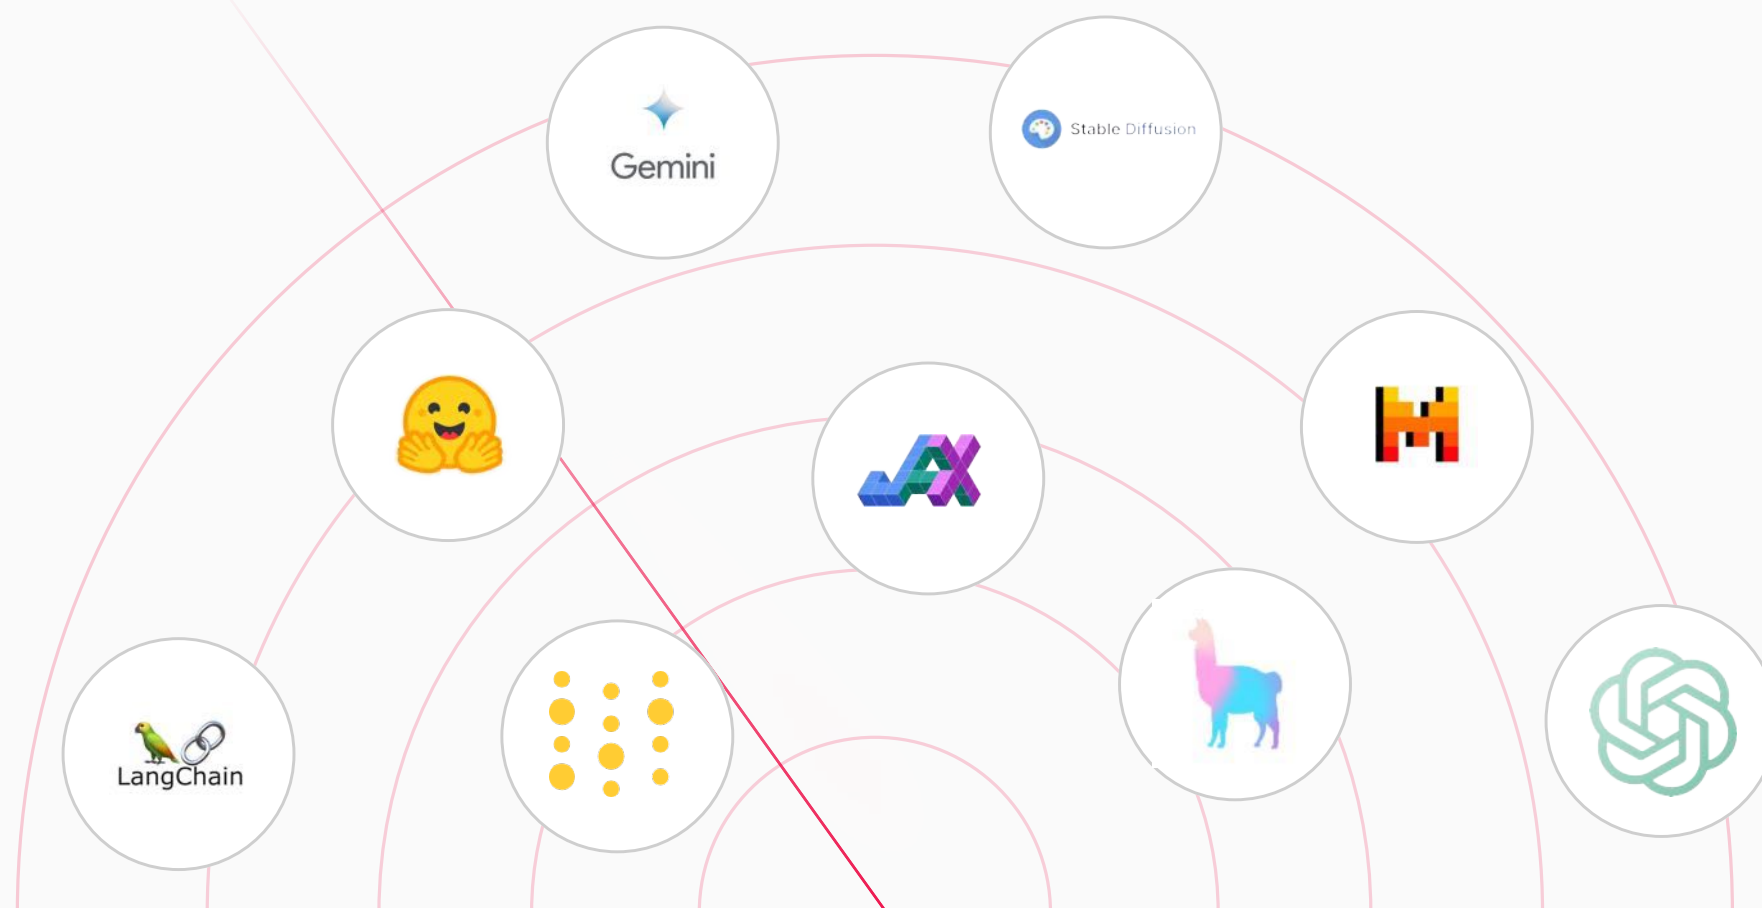

Generative AI Related Services

Throughout the Generative AI journey, our development services assist clients in creating a strong strategy from the start, actively contributing to model development as data emerges.

We also support scaling operations and implementing automation with comprehensive Generative AI engineering solutions. Post-automation, our dedicated services ensure continual Generative AI model evolution, allowing clients to focus on their core business and achieve sustained growth in the ever-changing Generative AI landscape.

Customer Asks

- ✔ Generative AI Model Integration
- ✔ Interactive AI-generated Content Visualization
- ✔ AI Model Governance and Compliance
- ✔ Synthetic Data Generation from Various Sources
- ✔ Pattern and Insight Generation for Price Tracking
- ✔ AI-Driven Website Content Harvesting

We Provide

- ✔ Smooth Generative AI Model Integration
- ✔ Visual Representation of AI-Generated Outputs
- ✔ Strong Governance Frameworks
- ✔ Scraping and Synthesis of Data
- ✔ Dynamic Price Tracking

Healthcare

Shoorah (UK)

Your Mental Health Matters

Shoorah is a fresh and comprehensive wellbeing app that helps you support your mental health and nourish your wellbeing through a range of wellness tools.

Services Offered

Recommendation Engine

Problem Statement

Crafting a relevant content experience for a mental wellness app involves challenges in personalization, diverse demographics, dynamic mental health states, and data privacy. Balancing evolving trends, ethical curation, and user engagement demands a holistic approach with insights from mental health professionals, data scientists, and user experience experts.

Furthermore, accommodating diverse user demographics involves considering cultural nuances, language preferences, and varying accessibility needs. Tailoring content to resonate with individuals from different backgrounds and experiences necessitates a nuanced approach to ensure inclusivity and effectiveness across a broad user base.

Problem Statement

Keeping track of your health takes too much time and isn't engaging. It's hard for people to stick to healthy habits because they don't get quick feedback or personalized guidance. The current solutions also miss out on making health monitoring more fun and interactive with things like augmented reality.

We needed a solution that's different, one that makes health monitoring easy and enjoyable for users. The challenge was to create a system that works on your device, giving you real-time information and personalized advice. This means we needed a new and improved Passio SDK that meets the changing needs of users and takes your mobile health app to a whole new level of success.

Remodel AI (USA)

Transform The Home Remodeling Experience

Increase your paint sales by bringing your paint and home improvement store into the homes of your customers. Allow your users to visualize and purchase your paint and home remodel products.

Services Offered

SDK Dev

App Dev

Computer Vision

eCommerce

Anomaly Detection

Problem Statement

The apps available now don't do a great job of helping customers picture how different products would actually look in their homes. This makes it hard for people to decide what to buy for their home improvement projects. On top of that, these apps don't use cool technology like computer vision to understand what changes are needed in a room or the condition of surfaces. To make things easier and more fun for customers, we really need a new solution. This solution should bring together augmented reality and computer vision to let customers not just imagine but practically see how different products would fit into their homes. This way, they can confidently choose the right paint or home improvement items..

Data Labelling

Problem Statement

The process of manually recognizing and labeling images for training AI models is both labor-intensive and time-consuming. This manual approach poses limitations on the scalability and efficiency of AI development, hindering the swift progress of technology. Without an automated platform, the recognition, training, and labeling of images face obstacles, causing a slowdown in the advancement of AI technologies. In response to these challenges, we have developed a platform to streamline and automate these processes, addressing the inefficiencies associated with manual image recognition and labeling.

Chipbrain (USA)

Emotionally intelligent AI for your conversations

Founded by MIT and Harvard graduates, We Designed the world's best communication-assistance AI to empower you with augmented empathy & persuasion in conversations.

Services Offered

- Discovery
- App Dev
- Sentiment Analysis
- Audio Processing
- AI Summary

Problem Statement

Understanding emotions in conversations is a tricky task when done manually, leading to inaccuracies in assessing customer feelings and affecting interactions. The current methods lack precision, highlighting the need for an advanced machine learning solution to precisely recognize emotions. This improvement is crucial for enhancing customer engagement and gaining valuable insights from conversations.

The AI's ability to gauge and respond to customer emotions in real-time enhances the overall engagement level. This personalized approach can lead to more meaningful and positive interactions, fostering a stronger connection between the sales representative and the customer.

AI Summary

Problem Statement

Within the healthcare landscape, a formidable challenge persists – a substantial 50% of doctors' time is entangled in administrative tasks, diverting their attention and resources away from direct patient care. This significant misallocation not only hampers the quality of patient interactions but also bears a hefty economic toll, resulting in an annual loss of \$135 billion. This pressing issue underscores the urgent need for a transformative solution. A solution that can effectively untangle doctors from the complexities of administrative burdens, freeing up their invaluable time to concentrate on patient-centric activities. By mitigating this longstanding challenge, we aspire to not only enhance the efficiency of healthcare providers but also foster a more patient-focused and economically sustainable healthcare ecosystem.

Curiosity Labs AI (USA)

best sidekick for every kid

Its a team driven by a passion for crafting the ultimate sidekick for every child – an intelligent digital companion fostering safe, engaging, and interactive exploration, learning, and creativity. Their mission is to nurture well-rounded, curious, creative, and caring individuals in the world of kids.

Problem Statement

In the realm of childhood development, the absence of a comprehensive and intelligent digital companion presents a challenge. Current solutions may lack the depth needed to provide a truly enriching experience for children, hindering safe, engaging, and interactive exploration, learning, and creativity. This gap underscores the need for a dedicated team to craft the ultimate sidekick that fosters holistic development – nurturing well-rounded, curious, creative, and caring individuals. The challenge lies in addressing the deficiencies in existing digital companions to create a solution that aligns with the diverse needs and aspirations of every child.

Oraq AI (Canada)

Empowering Dentists to Improve Treatment & Acceptance

The OraQ™ Clinical Decision Support System is a dental AI and machine learning platform that is redefining how dental professionals engage, diagnose, and treat patients on a holistic level.

Problem Statement

The dental industry faces a critical need for enhanced engagement, diagnosis, and treatment methods, as conventional approaches often fall short in providing comprehensive and efficient solutions. Dentists encounter challenges in delivering optimal care and gaining patient acceptance. The absence of advanced tools impedes the holistic assessment of dental conditions. To address these gaps, there is a crucial demand for an innovative solution. The OraQ™ Clinical Decision Support System leverages dental AI and machine learning, offering a transformative platform that empowers dentists to elevate their practice by improving treatment outcomes and patient acceptance.

Web App Dev

Prompt Engineering

LLM

Problem Statement

The processing of complex documents poses a substantial challenge for businesses, as existing automation tools often struggle with achieving acceptable precision and accuracy in handling intricate document structures. Many organizations find themselves limited to traditional solutions, relying on rules and OCR-based methods, or face the daunting prospect of investing in costly custom AI projects. This creates a dilemma, where businesses are forced to compromise between suboptimal automation or budget-intensive custom solutions.

In this landscape, the need for an accessible and efficient solution becomes evident. Altilia Intelligent Automation steps in as a no-code/low-code cloud-based platform, offering enterprises the means to construct AI models effortlessly and automate their most intricate document-intensive processes.

Reeve AI (USA)

AI Powered MLS Platform

Reeve is the AI-powered marketplace of real estate services, helping you sell (or rent) your property without high commissions.

Problem Statement

Traditional real estate listing processes are often time-consuming and demand extensive manual effort, hindering property owners from efficiently showcasing and selling their homes. Existing methods may lack the technological edge needed to create eye-catching listings, accurately price properties, and effectively manage the complex sales process. Many property owners face the challenge of navigating through multiple platforms, marketing tools, and negotiation stages, often with hidden fees and uncertainties. To address these inefficiencies and streamline the entire property selling journey, there is a pressing need for an integrated, AI-driven platform like Reeve's. Such a solution can automate listing creation, simplify pricing analysis, provide professional media packages, and optimize the entire sales process, ensuring a hassle-free experience with transparent transactions and true 0% commission.
